

**GOVT. DEGREE COLLEGE SARAHAN
DIST. SIRMAUR, H.P.**

**SELF-ASSESSMENT REPORT
2023-24**

CRITERIA 5

**BEST PRACTICES, INNOVATION AND
INSTITUTIONAL DISTINCTIVENESS**

5.1 Best Practices Description & Outcome of Best Practices (at least two):

GOVT. DEGREE COLLEGE SARAHAN

BEST PRACTICES (2023-24)

Best Practice 1: Empowering the Students by Providing Coaching Classes for competitive Exams:

Objectives:

There is no denying the fact that economic growth is one of the indispensable factors for happiness. It has been generally observed that students throng to the college from the nearby villages in buses everyday and most of their productive time remains in the college. There are many researches in the field that show that most of the youth in the country despite possessing the degrees lack in knowledge of their subjects, General knowledge, numerical ability, soft skills and communication skills that's why they remain unable to secure a job neither in the Govt. sector nor in the private sector. In order to provide solution to this problem for our student our college has taken an initiative to provide coaching for various competitive examinations from the session 2023-24. The idea is to make the students able to enhance their knowledge so that they may qualify the various competitive exams and they may elevate their personality by learning soft skills and communication skills. In order to make them self-reliant and economically empowered, the principal motive of the institution is to open up a window through which they may become successful and contribute in the development of the society.

The Practice:

Every day the students who are interested in attending the coaching classes are provided an opportunity of coaching classes after the college hours. The teachers teach their respective subjects to the students from the point of view of competitive exams. Many students have been benefitted. Even after the final exams of the students of BA final year were over interested students were also given an opportunity to attend coaching classes for the PG entrance exam of the university.

Outcome:

Our students Anshil MA (Political science), Ritika (Political science), Jyoti (MA English) and others were selected for HP University.

Best Practice 2: Inclusion of every student as a member of either a club or society:

Objectives:

Giving access to higher education is a fundamental for any good society but the question arises have our higher education institutions provided them the opportunities to provide them the holistic development, enhancement of their skills, personal growth, confidence building, inclusivity and diversity. All the students who come to college they all have a common desire to enhance their personality. If it is asked from any student what is the motive behind joining the college then answer comes- to improve my personality and become successful. But they themselves don't know how they may enhance their personality so the

college took this initiative to fulfill this objective include every student in either a club or society so that they may participate in various activities organized by the those clubs/ societies.

The Practice:

After the inclusion of every student in either a society or club we ensure that every student gets involved either directly or indirectly in the organizing or conducting of the various activities and functions of that particular club. That is the way how the various qualities like fortitude, leadership, social skills, patience, perseverance, empathy are inculcated among the students. During their participation in various programs directly or indirectly like NSS function, Teachers' day function, Road safety club function etc. a feeling of camaraderie is developed and they start taking pride in their own culture when they perform their folk dance and sing their folk songs.

Outcome:

It has been observed that many students have overcome their stage fright after performing on the stage which was a common problem among the students. It has been observed that students who participated in these activities they became more confident and extrovert and developed their leadership skills.

5.2 Special initiatives taken for:

1. Rain water harvesting and its use for gardening and cleanliness

It is believed that India is going to face the vilest water crisis in the near future as many cities may run out of ground water. So efforts are being made from all sides to save water and conserve water. One of the most plausible solutions of this water crisis may be rain water harvesting. Keeping this vision of conserving and saving water, Govt. Degree College Sarahan follows the practice of the rainwater harvesting. Two underground tanks have been constructed (which were built during the construction of the college building as part of the original plan) in which the entire rainwater of the college building and campus gets stored. Then with the help of electric water pumps the water is supplied to the rooftop tanks from where it reaches to the cisterns of the toilets and is used for flushing in the washrooms. This water is also used for gardening as per the need. Rainwater harvesting is an important eco- friendly practice. It is a green practice which helps in keeping the groundwater level undisturbed and even charging the aquifers. It is quite useful in stopping soil erosion as well.

So rainwater harvesting is an effective and environmentally conscious practice that significantly benefits our college by reducing water consumption, cutting costs, and contributing to environmental conservation. In this way our college plays a crucial role in promoting sustainability. Moreover, integrating rainwater harvesting systems into the campus infrastructure provides an invaluable learning opportunity for students and fosters a culture of creating awareness about the sustainable environment through this green practice of water conservation.

Rain water Storage Tank

2. Plastic Free Campus:

Polythene-Free Campus Initiative

To promote sustainable development and eco-consciousness in our educational institution Government Degree College Sarahan, we have taken this initiative of making the campus Polythene free. The aim of this initiative is to eliminate the use of polythene (commonly referred to as plastic) in and around campus, thus reducing the environmental impact of plastic waste.

With an increasing global awareness of the harmful effects of plastic pollution, adopting a polythene-free policy can serve as an important strategy for promoting sustainability and environmental stewardship among students, staff, and faculty.

There are some specific reasons why this initiative was taken:

- **Non-Biodegradable:** Polythene takes hundreds of years to decompose, leading to long-term environmental pollution.
- **Wildlife Threats:** Polythene waste is harmful to wildlife, as animals can mistake plastic for food, leading to ingestion, entanglement, and often death.
- **Resource Consumption:** The production of polythene involves the consumption of fossil fuels, contributing to greenhouse gas emissions and climate change.
- **Waste Management Issues:** The enormous volume of plastic waste poses a formidable challenge for waste management systems, leading to choking of drains and unsightly litter in public spaces.

Steps to Achieve a Polythene-Free Campus:

1. Policy and Commitment:

- The Principal, staff and the students are committed to eliminate polythene by following a clear policy of restricting the use SINGLE USE PLASTIC across campus.
- Engage NSS, CSCA, ROVERS AND RANGERS volunteers specifically along with the other students and faculty in discussions to ensure broad support for the initiative.

2. Awareness Campaigns:

- Volunteers of NSS organize various talks and drive to make the students aware about the hazards of the use of polythene and single use plastic.
- There are signboards painted in the campus clearly mentioning ONE USE PLASTIC FREE CAMPUS.

3. Infrastructure Development:

- We have installed a water dispenser connected with a water purifier to provide the safe drinking water to the students and to discourage the use of bottled water.
- We encourage the students and staff to use the reusable containers, bags, and utensils instead of Single use plastic items.

4. Collaboration and Partnerships:

- Our NSS volunteers play a pivotal role in making the campus 'Single Use Plastic Free' through awareness campaigns and along with that through cleanliness drives in the community from the time to time taking the help of local government institutions, environmental NGOs, and local people of the society.
- We share success stories and best practices with other institutions and society at large through our Facebook page and website by uploading the pictures of various drives and awareness programs related to this practice to inspire a wider movement towards polythene-free campuses.

NOTICE

Dated:- 16th Sept.,2023

All the Volunteers of NSS are hereby directed to attend oath ceremony under "Swachhta Hi Seva" campaign on 18th Sept. 2023 at 2:00pm in the college Hall.
