

STUDENT CENTRIC COLLEGE PLAN (2024-2025)

1. Since Govt. Degree College Sarahan (Sirmaur) is affiliated to Himachal Pradesh University, the proposed academic calendar by the same is followed in letter and spirit. An online admission portal has also been started/introduced in the college so that students may easily get the admission without standing in the long queues. The defined curriculum for all the academic courses by HPU is available on the college website for easy accessibility of the students. In the beginning of each academic session, college organizes an orientation/induction program to make the students aware about the various aspects of RUSA system in the college like Credit system and system of assessment along with making them aware about of various facilities being provided in the college like library, scholarship, IT lab, magazines and newspapers etc. Though we display every information on the notice board and send it to the students through Whats App groups as well but still we plan to install a digital notice board so that we may communicate to the students in a better and effective manner about the various notices.
2. In order to enhance the quality of teaching the technology plays a vital role the students have been provided with smart class rooms, IT-Lab, computer facility in the library of the college. We plan to upgrade our library further by buying more books and to upgrade it with SOUL 13.0 software in near future.
3. Though teachers keep sending notes in the form of PDF and word files and links of youtube videos related to the contents of the syllabi but further we plan to take online classes especially during the preparatory days of the exam too in order to solve the queries of the students. So that they may ask their problems through online classes from the comfort zone of their homes without travelling to come to college to just ask a question.
4. With the intention that the education of any deserving student shouldn't be hampered for want of money therefore various types of scholarships sponsored by central or stateGovt. for meritorious students have been introduced. College ensures that all deserving students get the scholarships meant for them. College also plans to find some other source from where more scholarships may be arranged for the needy students who don't fall under the criteria of the Govt. sponsored scholarships and for those students too who want to pursue further education after their graduation.
5. The college has provided a support mechanism to cater to the needs of all the students with a special emphasis to the students belonging to socio-economically disadvantaged and distressed groups as well. The Grievances redressal cell, Anti-ragging cell, Sexual harassment committee, Women Development Council are cells and committees of the college which play a vital role in providing the support and psychological solace to the students that their needs are being looked after. We plan to enhance the awareness programs

conducted under these committees and cells for the further welfare of the students.

6. For the development of the students, Career-counseling and placement cell organizes various seminars and lectures to provide them the knowledge of various job opportunities. It organizes a Rozgar Mela too for the Final year students to provide them the opportunities of employment in various corporate houses. Further we plan to organize soft skills workshops and to invite more companies to the Rozgar Mela so that more employment opportunities may be provided to the students.

7. For the holistic development of the students the college has provided the students various platforms like college magazine, Red-Ribbon club, Electoral literacy club, Anti-drug cell, Road safety club, and many other societies we have ensured that our every student must be enrolled under at least one of the above mentioned clubs or societies. Further we plan to ensure that each participant of these clubs and societies must take part in their activities actively and at least some of them must be trained for further leadership roles. So that they may further contribute in the mission of nation building as well.

8. For the need based learning we try our best to cater to the needs of every section e.g. rural students, Divyang students, girl students, gifted and slow-learners and students as per their needs. We further plan to install a few softwares in our Library and IT lab for the visually impaired students in the future so that it may facilitate their learning. We plan to build a Language lab too to better the pronunciation and grammatical knowledge of English and Hindi of the students if a special budget is granted for that.

9. Though coaching for various competitive examinations is being provided to the students for one hour by the teachers of the college after the routine classes of students are over still we further plan to provide the students with coaching for various competitive examinations by a professional coaching centre if the budget permits us.

10. Though CSCA keeps giving their feedback and advice to the Principal and staff members for the development of the college but we plan to motivate CSCA to organize their cultural function. We also plan to make athletic meet and cultural function of CSCA a regular feature.

Though, college has been trying its level best to cater to the other needs of the students along with the paramount need of teaching the academic curriculum. College administration leaves no stone unturned to enhance the personality of the students and for their holistic development within our resources and academic framework.
